PARITOSH JAISWAL

Bhopal, India | +91 99935 23530 | jaiswalparitosh8@gmail.com | github.com/Paritosh012 | linkedin.com/in/paritoshjaiswal-ji

PROFESSIONAL SUMMARY

Fresher MERN Stack Developer who designed, built, and deployed a production-grade multi-tenant SaaS platform end-to-end during a Full Stack Developer internship — from MongoDB schema design and JWT-based role authentication to Razorpay payment integration and Render deployment. Skilled in React.js, Redux Toolkit, Tailwind CSS, Node.js, and Express.js, with a proven ability to independently identify and resolve complex bugs, including race conditions and security gaps, before deployment. IIT Guwahati-certified in Advanced MERN Stack. Currently building with Next.js and exploring Agentic AI.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Redux Toolkit (with redux-persist), React Hooks, React Router, Tailwind CSS, Vite, Axios

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Authorization (RBAC), Bcrypt

Databases: MongoDB, Mongoose (ODM), Schema Design

APIs & Integrations: Razorpay Payment Gateway, Brevo HTTP API, Third-Party API Integration

Tools & Deployment: Git, GitHub, Postman, VS Code, Render, Vercel

Concepts: MVC Architecture, Multi-Tenant SaaS Architecture, Subscription Billing, Debugging & Error Handling

Currently Learning: Next.js (App Router, Server Components), TypeScript, Agentic AI

EXPERIENCE

Full Stack Developer Intern — Cybrom Technology, Bhopal **Feb 2026 – Apr 2026**

Project: Multi-Tenant Travel Booking SaaS Platform — MERN (MongoDB, Express.js, React.js, Node.js), Redux Toolkit, Razorpay, JWT, Vite

- Designed and built a MakeMyTrip-style multi-tenant travel booking SaaS end-to-end, implementing three-tier role-based access control (Super Admin, Host, Customer) with JWT authentication and protected routes across all API endpoints.
- Integrated Razorpay payment processing with server-side HMAC SHA256 signature verification, and built a tiered subscription billing system with per-host booking-limit enforcement and feature gating.
- Eliminated concurrent seat-booking race conditions using atomic MongoDB transactions; deployed to Render, resolving dynamic CORS and reverse-proxy header issues.

PROJECTS

Yatri — Agentic AI Travel Companion | Node.js, LangChain.js, Groq API (Llama 3.3) **In Progress**

CLI travel assistant built on a ReAct agent with tool calling (weather, currency, time) and persistent user memory.

Developer Portfolio | Next.js, React.js **2026**

Responsive personal portfolio website built with Next.js to showcase projects, skills, and experience.

To-Do List App | React.js, Redux Toolkit **2026**

Task management app to add, complete, and delete tasks, with global state managed using Redux Toolkit slices.

EDUCATION

B.Tech — Computer Science & Engineering, Radharaman Engineering College, Bhopal **2026**

CGPA: 7.04

CERTIFICATIONS

Advanced Certification in MERN Stack — E&ICT Academy, IIT Guwahati **Jan 2025 – Aug 2025**

Offline Program | MeitY, Government of India

LANGUAGES

English, Hindi
